

Section 2 Hazard Identification

Section 1. Identifica	Section 1. Identification		
Product Identifier	Chem-Cool 100 %	Version: 8	
		Effective Date: 9 December 2020	
Other Means Of	None		
Identification			
Initial Supplier	Chemfax Products Ltd.		
Identifier	11444 – 42 Street SE		
	Calgary, AB T2C 5C4		
	Tel: 403-287-2055		
Recommended Use	Inhibited heat transfer fluid		
And Restrictions	No restrictions.		
On Use			
Product Family	Blend		
Emergency Phone	1-855-887-2055 Monday - Friday 8:0	00am - 4:30pm MST	

Section 2. Hazard Identification		
Hazard Classification		
	Acute Toxicity (Oral) - Category 4	
Signal Wand	Specific target organ toxicity (repeated exposure) - Category 2	
Signal Word	Warning	
Hazard Statement	Harmful if swallowed.	
	May cause damage to liver and kidneys through prolonged or	
	repeated oral exposure.	
Precautionary Prevention	Wash hands thoroughly after handling.	
Statement	Do not eat, drink, or smoke when using this product.	
	Do not inhale fume, mist, vapours or spray.	
Precautionary Response	IF SWALLOWED: Call a doctor if you feel unwell. Rinse mouth.	
Statement	Get medical attention if you feel unwell.	
Precautionary Storage	No storage statement	
Statement	-	
Precautionary Disposal	Dispose of contents / container in accordance with local regulations	
Statement		
Other Hazards	None	
<u> </u>		

Section 3. Composition	on / Information on Ingredients	·	
Chemical Name	Common Name or Synonyms	CAS NO. and Other Unique Identifiers	% by weight
Ethylene Glycol	Glycol	107-21-1	100
Balance of ingredients are considered non-hazardous and constitute a proprietary blend			

Section 4. First-Aid Meas	ures
Eye Contact	Flush eyes with water for 15 minutes. Seek medical attention.
Skin Contact	Flush area with water. If irritation persists seek medical attention. Launder clothing before reuse.
Inhalation	Remove victim to fresh air. If there is difficulty breathing, seek immediate medical attention.
Ingestion	Give two glasses of water. Do not induce vomiting. Lay victim on left side to prevent aspiration of any vomit. Seek immediate medical attention.
Most Important	Breathing difficulties.
Symptoms and Effects Both Acute and Delayed	
Immediate Medical	Effects of ethylene glycol poisoning appear in three stages. Initial
Attention and Special	stages in the first $6 - 12$ hours is characterised by central nervous
Treatment	system effects (transient exhilaration, nausea, vomiting and potentially coma, convulsions and death). The second stage lasts from 12 – 36 hours after exposure and is initiated by the onset of coma. It is characterised by tachypnea (laboured respiration), tachycardia (rapid heartbeat), hypotension (low blood pressure), cyanosis (blue discolouration of skin, nail beds, and mucous membranes due to lack of oxygen) and in severe cases pulmonary oedema, bronchopneumonia, cardiac enlargement and congestive heart failure. The final stage occurs at 24 – 72 hours post exposure and is characterised by renal failure, from mild symptoms to complete anuria (failure of the kidneys to produce urine) with acute tubular necrosis that can lead to death. Hyperoxaluria (presence of excess oxalic acid or oxalates in the urine) is found in most cases. Ethylene glycol poisoning will always cause metabolic acidosis (blood pH becomes lower than 7.5). Treatment is required within the first three hours of exposure. High proof whisky can be administered prior to hospitalization if treatment is delayed. Haemodialysis is the most effective means of removing ethylene glycol and its metabolites form the body.

Section 5. Fire-Fighting Mo	easures	
Suitable and Unsuitable	Carbon dioxide, dry chemical, and water spray.	
Extinguishing Media		
Hazardous	Alcohols, aldehydes, carbon dioxide and carbon monoxide, ethers,	
Combustion Products	toxic fumes.	
Specific Hazards Arising	Thermal decomposition can lead to release of irritating gases and	
From the Product	vapours. Keep product and empty container away from heat and	
	sources of ignition.	
Special Protective	Fire-fighters should wear self-contained breathing apparatus and full	
Equipment and	protective clothing. Use water spray to cool containers and structures	
Precautions for	exposed to fire.	
Fire-Fighting		

Section 6. Accidental Release Measures		
Personal Precautions,	Gloves (neoprene), safety glasses, coveralls.	
Protective Equipment and	Ensure adequate ventilation. Do not breathe vapours or spray mist.	
Emergency Procedures	Avoid contact with skin, eyes and clothing.	
Environmental	Prevent entry of spilled materials into sewers or watercourses. Dike if	
Precautions	required.	
Methods and Materials for	Wear full protective equipment. Dike area and collect spilled material	
Containment and	by pumping into holding vessel or by soaking up with absorbent	
Clean-Up	material, then transporting it into an appropriate container for disposal.	
	Area will be slippery with residues, wash area with water	

Section 7. Handling and	Section 7. Handling and Storage		
Precautions for Safe	Handle with care. Do not eat or drink near this product, and employ		
Handling	good housekeeping practices. Empty containers will contain residues, these should not be cut or welded - vapours mixed with air can form explosive mixtures.		
Conditions for Safe Storage	Store in a cool dry place. Keep containers closed at all times.		

Section 8. Exposure Controls / Personal Protection				
Control Parameters	TWA: 8 Hr	STEL: 15 min	Ceiling	IDLH *
Ethylene Glycol			50 ppm (NIOSH)	
			50 ppm (CA	D AB OEL)

	<u> </u>	
	* Immediately Dangerous to Life and Health	
Exposure Controls	Local exhaust ventilation	
Appropriate Engineering	Ensure adequate ventilation, especially in confined areas. Ensure that	
Controls	eyewash stations and safety showers are close to the workstation	
	location.	
Individual Protective		
Measures		
Eye/Face Protection	Safety glasses.	
Skin Protection	Wear gloves (neoprene), coveralls - chemical resistant.	
Respiratory Protection	If exposure limits are exceeded, an air purifying respirator, fitted with	
	cartridges for organic vapours must be worn.	

Section 9. Physical and Chemical Properties		
Appearance	Clear, pink liquid	
Odour	Mild odour	
Odour Threshold	0.08 – 25 ppm	
pH	8.0	
Flash Point	111 °C / 231.8 °F	
Boiling Point and Boiling Range	190 − 240 °C	
Melting Point and Freezing Point	- 35 to − 13°C	
Evaporation Rate	No data.	
Flammability (solid, gas)	Not applicable	
Upper and Lower Flammability or	15.30 vol % and 3.20 vol %	
Explosive Limits		
Vapour Pressure	0.06 – 0.12 (mm Hg @ 20 oC)	
Vapour Density	2.1	
Relative Density	1.116	
Solubility	Completely miscible in water	
Partition co-efficient, n-	No data	
Octanol/Water		
Auto-ignition Temperature	413 °C / 775.4 °F	
Decomposition Temperature	> 500°C	
Viscosity	21 cP (20°C)	

Section 10. Stability and Reactivity	
Reactivity	None
Chemical Stability	Stable
Possibility of Hazardous	Will not occur
Reactions	

Conditions to Avoid	Naked flames
Incompatible Materials	Alkali metals, strong acids, strong alkalis and strong oxidizing agents
Hazardous Decomposition	Glycolic acid
Products	

Section 11. Toxicological Information			
Component Toxicity	LD50 Oral	LD50 Dermal	LC50 Inhalation
Ethylene glycol	4700mg/kg(Rat)	10876 mg/kg (Rabbit)	
	9500mg/kg(Mouse)		
Likely Routes of Exposure			
Skin:	•	n cause burning and rec skin and can cause heal	
Eyes:	May cause irritation and redness.		
Inhalation:	Inhalation of larger quantities of this material will be harmful.		
	-	ratory tract, digestive tra	
	_	ea, faintness, light-head	•
	headache, cyanosis (blue discolouration of skin, nail beds, and		
		due to lack of oxygen), l	ung oedema (fluid in
T	the lungs), convulsio		11 11 1
Ingestion:	_	luct may lead to kidney,	_
	and liver damage.	pances, vomiting, diarrho	bea, kidney failure,
Acute Toxicity Estimates	No data		
(ATE)	NO data		
STOT (Specific Target	Central nervous syste	em (CNS)	
Organ Toxicity) – Single	·		
Exposure			
STOT (Specific Target	Kidney and Liver		
Organ Toxicity) - Repeated			
Exposure			
Aspiration Toxicity	Not classified		
STOT (Specific Target	Liver and kidney dar	nage.	
Organ Toxicity) – Repeated			
Exposure			
Skin corrosion / Irritation	Irritant		
Serious Eye Damage /	Irritant		
Irritation			
Respiratory or Skin	Not classified		
Sensitization	N. 11 . 1		
Carcinogenicity	Not listed.		

Re	productive Toxicity	·
-	Sexual Function and	Not classified
	Fertility	
-	Development of	Not classified
	Offspring	
-	Effects on or via	Not classified
	Lactation	
Ge	rm Cell Mutagenicity	Not classified
Int	eractive Effects	Not classified
Ot	her Information	Not applicable

Section 12. Ecological Information		
Ecotoxicity	Ethylene glycol LC50: 51,000 mg/L (Flathead minnow) LC50:	
	27,549 mg/L (Bluegill) LC50: 18,000 – 46,000 mg/L (Rainbow trout)	
Persistence and	Readily degradable	
Degradability		
Bioacumulative Potential	Not likely	
Biodegradability	Is biodegradable	
Mobility in Soil	Not available	
Special Remarks	BOD: 8 to 82 % @ 5days; 58 to 75% @ 10 days: 81 to 94 % @ 20	
	days COD: 1.29 mg/mg.	
Other Adverse Effects	Not applicable	

Section 13. Disposal Considerations	
Disposal Considerations	Dispose of in accordance with local, provincial and federal regulations

Section 14. Transport Information	
UN Number	Not applicable
UN Proper Shipping Name	Not applicable
Transport Hazard	Not applicable
Class(es)	
Packaging Group	Not applicable
Environmental Hazards	Not applicable
Bulk Transport	Not applicable
Special Precaution	Not applicable
DOT Erg#	Not applicable

Section 15. Regulatory Information		
Canada – DSL Inventory	All components of this product are either on the Domestic Substances	
	List (DSL), Non-Domestic Substances List (NDSL), or exempt	
TSCA	All components of this product are either on the Toxic Substances	
	Control Act (TSCA) Inventory List or exempt	
Additional Information	None	

Section 16. Other Information		
NFPA Rating	Health-2/ Flammability-0/Reactivity-0/Special Hazard-Not applicable	
HMIS Rating	Health-2/Flammability-0/Reactivity-0/Personal Protection-See Section 8.	
Prepared by:	Chemfax Products Ltd., Technical Department	
Date Prepared:	18 August, 2011	
Date of Latest Revision: 9 December 2020
