

“OXYGEN SCAVENGER”

Reacts rapidly with dissolved oxygen in boiler systems. Oxygen Scavenger is specially formulated with catalyzed materials to provide immediate removal of oxygen in boiler feed water systems. Efficient chemical deaeration can eliminate the small quantities of oxygen remaining after the most effective mechanical treatment, that can cause localized pitting in a boiler system.

Applications: Boiler feed water systems as well as hot and cold water circuits. Oxygen Scavenger protects metal surfaces from oxygen attack. Oxygen Scavenger rapidly reacts with dissolved oxygen is easy to use and provides excellent protection for the system.

Directions / Dilutions: Add as required. No dilution is recommended due to the amount of oxygen that may be present.

Laboratory Analysis:

Appearance:	Brown, opaque liquid
Odour:	None
Corrosion:	Non-corrosive
Flammability:	Non flammable
p.H. at 10% solution:	10
Solubility:	Completely soluble in water
Toxicity:	Non-Toxic

Packaging: 20 Litre pails

For further information consult the material safety data sheet and label.
