

Pro-Watch Misting System

The Misting System is engineered to dispense Odour Counteractants, Micro-organisms and other odour control chemicals through a misting nozzle. This system is perfect for roll away bins, trash compactors and other garbage repositories that produce odours.

SYSTEM COMPATIBILITY

- **Accurate** and **reliable**
- **Ideal** for **remote locations**
- Operates with **115 volt** transformer or **6 volt** lantern batteries
- Combines **durability** of our peristaltic pump with the **reliability** of our solid state controls
- **Wall** or **shelf mounting** capability

KEY FEATURES

- **High-impact thermoplastic**, watertight case
- **State of the art** microprocessor timer control
- **Self priming** peristaltic pump
- **External prime** functions
- **Optional 7-day** programmable timer
- **Non-volatile** program memory
- **Real-time** display with **backup battery**

OPERATING BENEFITS

- **Simple** to program
- Program up to **20 dispensing events per day**
- **Minimum maintenance** required
- **No check valves**
- **Precise metering**
- **Only the squeeze tube** comes in **contact** with **chemical**
- Easy to read **LCD display**
