

Chemical Powder Mixer

An industrial Drum Mixer for mixing powdered vehicle wash detergents such as Chem Soft and Sparkle.

It has electronic interval timer which allows on and off cycles to be set at 5, 10 or 15 minutes independently or it can be set to operate continuously. With a three blade mixing head it allows for quicker and more efficient mixing. The Drum Mixer is mounted on a custom made drum and comes complete with two submersible tubes so that the fill hose and the chemical draw lines do not get entangled in the mixer.
